XRF-TI
Transmitter to XRF wireless transmission system

Original operating instructions

Intended use: Monitoring safety edges on doors and gates, in combination with a receiver XRF

Safety instructions

- Read these operating instructions thoroughly before putting the device into operation and keep them for future reference.
- Do not use this product other than for its specified application.
- Only trained and qualified personnel may install and initialize the device.
- Only authorized factory personnel may perform hardware/software changes or repairs to the product.
- Failure to follow these safety precautions may cause damage to sensor or objects, serious personal injury, or death.
- It is the responsibility of the equipment manufacturer to carry out a risk assessment and to install the system, in compliance with applicable local, national and international regulations, safety standards, codes and laws as well as the Machinery Directive 2006/42/EC, should this apply.
- Always consider the safety functions of your applications as a whole, never just in relation to one individual section of the system.

Set-up

1.1 Connect battery

1. Loosen screw (at original delivery shipped in bag with Philips screw driver #00)
2. Carefully pull out the PCB
3. Plug in connector
4. LED flashes 5x (confirms battery connected)
5. Pairing (1,2) if required
6. Slide in the PCB again
7. Close the housing, tighten the screw (Philips #00, shipped with unit)

- The installer is responsible for testing the system to ensure it meets all applicable safety standards.
- Safety devices that are classified as Category 2 according to EN ISO 13849-1 must be tested regularly – at least once per cycle.
- If the safety device is not requested operationally at least once a year, it must be checked manually by the operator at least once a year.
- Pay attention to all local relevant electrical safety regulations.
- Protect the device with a housing against contamination or aggressive environments.
- This device contains batteries.
- Observe the local regulations for battery disposal.
- After accessing the inside of the sensor, ensure the cover/protection seal is closed tightly to achieve designated protection rating.
1.2  **Pairing**

Pairing is possible with open transmitter or later in mounted situation.

**1.2.a  Pairing at open state**

After initiating pairing on Rx (see receiver manual), press button

**1.2.b Pairing at built-in state**

After initiating pairing on Rx (see receiver manual), press the edge two times within 2 sec.

1.3  **Mounting**

XRF-TI is designed for the concealed installation in the contact profiles of ExpertSystem (see assembly and mounting instruction). However it can be wired with other safety edges eg. where space is limited.

1.4  **System check (mandatory after each set-up)**

- Check the system by pressing the safety edge
- The LED flashes when activating the sensor element (pressing the sensing edge) and flashes again when releasing the sensor element.
- Does the door/gate stop when the sensing element is activated?

2  **Trouble shooting**

**2.1 Warning indicator for low battery voltage**

<table>
<thead>
<tr>
<th>Receiver</th>
<th>Beep 3x</th>
</tr>
</thead>
<tbody>
<tr>
<td>Every minute</td>
<td></td>
</tr>
</tbody>
</table>

**2.2 Battery change**

1. Order new battery (prepared with connector)  
2. Pull out the PCB (see 1.1.)  
3. Disconnect battery plug and remove battery  
4. Insert new battery, plug in connector  
5. Slide in the PCB  
6. Close the cover again  
7. **System test mandatory!**  
8. Dispose battery acc. to local regulations

3  **Technical data**
