

RFGate 3.W.T

Transmitter for wicket doors to RFGate 3 wireless signal transmission system

Supplementary sheet to the original instruction manual

General

Intended use: In combination with a receiver RFGate 3.x.R

1 Safety instructions

i Battery life up to 2 years, but it is recommended batteries are changed every 12 months.

2 Common application

2.1 Industrial door with wicket door

Transmitter for wicket door monitoring. The STOP function of the control is activated when the door is open.

3 Installation sequence set-up

→ See instruction manual of receiver.

4 Pairing transmitter with receiver

→ See instruction manual of receiver.

The distance between transmitter and receiver and further transmitters must be at least 0.5 m.

5 Mounting and set-up

6 Maintenance

6.1 Warning indicator for low battery voltage

Receiver: 3 beeps every minute

To find out which transmitter has low battery voltage:
Press each edge and open / close the wicket door.
A beep indicates the low battery.

6.2 Battery change

- ① Open housing
- ② Remove batteries (don't touch the reed switches)
- ③ Insert new batteries (take polarity into account)
- ④ Put on the cover

7 Alternative installation with double sided tape

Caution!
Ensure surfaces are clean, dry and free of dust and grease.

8 Technical data

Transmitter	
Battery power	2x Lithium 3 V type CR2032
Power consumption	Transmitting: 17 mA standby: 16 µA
Protection class IEC 60529	IP65

System	
Frequency bands	868.15 MHz & 869.525 MHz
Range	Under optimum conditions up to 100 m
Pollution degree	2
Working temperature	-20 °C to +55 °C

9 EU Declaration of Conformity

CE See attachment

10 WEEE
