

Short guide

UniScan / US beam

Smart Access

This information sheet does not replace the original operating instructions! Read the operating instructions before commissioning the device!

Installation and adjustment

1. Fit housing (see operating instructions, chapter 2).
2. Click US beams into aluminium profiles.
3. Check whether the US beams are clicked in correctly and therefore secured well in the profile!
3. Position US beams and set inclination angle
→ The left and right bearing clamps must be at the same angle (see operating instructions, chapter 2.4).
4. If several sensors are used, connect these with the ribbon cable
5. Click cover onto profile (working from front to back) and ensure that the US beam's inclination angle doesn't change!

Electrical connections

US beam		Y-adapter	
⊖ ⊕	6 test yellow	white	-/~
⊖ ⊕	5 NO pink	brown	+/~
⊖ ⊕	4 NC green	green	COM
⊖ ⊕	3 COM grey	yellow	NO
⊖ ⊕	2 +/- brown	pink	NC
⊖ ⊕	1 -/~ white	grey	test
		blue	COM
		red	NO
		purple	NC

If AC voltage is supplied, only single sensor operation is possible and it is not allowed to cascade the sensors by ribbon cable.

When the UniScan is used as a safety sensor, the testing must be connected correctly!

Initialisation (see operating instructions, chapter 2.5)

- a) Initialisation is started by pressing the keys **F + 3 + 6** on the RegloBeam 2 remote control or by pressing the green key for 5 seconds!
- b) If both LEDs (red/green) flash, this indicates that the function has been triggered. The detection area must be exited within 6 seconds.
- c) If the red LED then flashes, this indicates that initialisation is under way. The detection area must not be entered during this time!
- d) Initialisation is complete when both LEDs go out.

RegloBeam 2 remote control

General:

If **G** flashes, a connection to the sensor could not be established.

→ Disconnect the power supply of the UniScan briefly or press briefly one of the two buttons on the sensor.

→ Direct the RegloBeam 2 remote control more exactly and directly at the sensor.

30 minutes after the last setting was undertaken on the sensor, configuration mode is automatically exited.

Settings with RegloBeam 2

Key	Function	Key	Brief description of function
A	Test input	1, 2, 3, 4 5*	① «High» active, pull up ② «High» active, pull down ③ «Low» active, pull up ④ «Low» active, pull down ⑤* Test input deactivated
B	Switch light points on and off Note: Once one or more beams have been switched on and off, re-initialise using F+3+5	1+ 1 or 2 2+ 1 or 2 3+ 1 or 2 4+ 1 or 2 5+ 1 or 2 6+ 1 or 2 7+ 1 or 2 8+ 1 or 2 9	Beam 1 selected, activate with key 1, deactivate with key 2 Beam 2 selected, activate with key 1, deactivate with key 2 Beam 3 selected, activate with key 1, deactivate with key 2 Beam 4 selected, activate with key 1, deactivate with key 2 Beam 5 selected, activate with key 1, deactivate with key 2 Beam 6 selected, activate with key 1, deactivate with key 2 Beam 7 selected, activate with key 1, deactivate with key 2 Beam 8 selected, activate with key 1, deactivate with key 2 All beams on Factory setting: Energy-saving beam pattern 1-3-5-7-8 on
C	Output signal	1, 2*, 7	① The relay picks up when a detection takes place (active) ②* The relay drops out when a detection takes place (passive) ⑦ Restart
D	Sensitivity	1, 2, 3* 4, 5* , 6, 7	① Object height > 10 cm ② Object height > 15 cm if sensor mounting height is up to 3 m ③ Object height > 20 cm ④ Object height > 30 cm ⑤* Object height > 40 cm ⑥ Object height > 50 cm ⑦ Object height > 70 cm
E	Relay hold interval	1, 2, 3, 4* , 5, 6 7, 8	① 0 ms ② 50 ms ③ 200 ms ④* 500 ms ⑤ 1 s ⑥ 3 s ⑦ 6 s ⑧ 10 s (ms=milliseconds, s=seconds)
F + 1	Device address	1–7	Address of between 1 and 7 can be selected, factory setting is 3
F + 2	Composition of the floor	1, 2* , 3	① Standard floor ②* Dark or reflective floor ③ Metal grating
F + 8	Enhanced levels	1, 2*	① Standard mode ②* Power saving mode

*Factory setting

Area properties

The dimensions of the detection area correspond to a mounting height of 2.2 m

Positioning

Based on sensitivity 3 (20 cm Object height)

- H** = Mounting height (cm)
- W** = Profile and door width (cm)
- W1** = Monitored area, total area width (cm)
- XL** = Area overlap (cm)
- x** = Maximum permitted spacing (cm) so that standard test body CA (DIN 18650:2005) is still detected.
- n** = Number of sensors (US beam) per door panel
- P** = Points sensor ① (US beam) to be deactivated
- D** = Detection width (cm) per sensor (US beam)
- d1, d2, d3** = Distance (cm) between sensors (US beam)

Safety according EN16005.
