Safety mats

Electrical surface switches for safe activation and deactivation of machines, devices and automatic doors

Reliable, robust, low-maintenance

- System is simple to install
- Surface switch for convenience and safety applications
- Especially robust due to full potting
- Standard and customer-specific designs available

Safety mats

Safety mats for safety and comfort applications

Safety
The safety mats from Bircher are used for detecting people or objects within a defined area. In conjunction with the EsMatix 3 safety switching device, they form a certified system for safeguarding danger zones, and thus for protecting people.

Convenience
Safety mats are characterised by their sturdy construction. They are available in a range of different shapes and designs. Directly connected to a controller, they are used as a switching element for convenient application.

Benefits for you

Universally applicable
- Maintenance-free
- Tailor-made for your requirements
- Easy to install
- Clearly visible
- Diverse shapes possible
- Surface structures and hardnesses can be selected
- Several switching zones are possible on one surface
- Individual mats, small batches and mass production

Functional principle
When anyone steps on the surface of the mat, or a load is placed on it, two parallel contact surfaces are pressed together and the electrical circuit is made.

Polyurethane outer sleeve
Contact plates with conductive surface
Spacer

Functional principle

SpacerContact plates with conductive surface
Polyurethane outer sleeve
Safety switching device EsMatix 3

- Performance level PL e, cat. 3 acc. to EN ISO 13849-1, in combination with a safety mat from Bircher
- Two inputs for connecting several safety mats
- Redundant safety output
- Monitoring output
- Automatic or manual reset
- Installation on DIN rail

In combination with the EsMatix 3 safety switching device, the Bircher safety mat is type-tested acc. to EN ISO 13856-1.

Reliable in every application

ESM-52/54
Standard shapes

**Situation**
Danger of injury due to moving machine parts

**Solution**
- Switch off a machine in the danger area

**Benefits**
- Robust standing surface with integrated safety switch
- Clearly visible
- Can be combined to protect larger areas

ESM-57
Special shapes

**Situation**
Automatic doors and locks

**Solution**
- Passage control and activation of revolving doors
- Individual passage at locks

**Benefits**
- Robust standing surface with integrated safety switch
- Several switching zones possible
- Individual shaping

EMP
Forklift mats

**Situation**
Forklift trucks

**Solution**
- Deactivation in case of unplanned exit from the operating platform

**Benefits**
- Robust standing surface with integrated safety switch
- Ergonomic, soft surface
- Vibration damping

ES-Button
Flat button

**Situation**
Machines and systems

**Solution**
- ES-Button flat button

**Benefits**
- Simply operate by hand, foot or with the arms
- Sturdy configuration for use in a contaminated and/or wet environment, or when subject to severe mechanical stress
Safety mats

ESM-52/54 safety mat – standard shapes: select L x W

Various sizes
The ESM-52 is available in eight different standard sizes (rectangular). The rectangular ESM-54, which is available with an active grip structure or with a smooth surface, can be used for special intermediate sizes. Both types can be laid both directly on the ground and under a floor covering such as a carpet.

ESM-52/54 safety mat – standard shapes:
- L = 8 defined lengths
- W = 8 defined widths

ESM-52D
Surface with grip pads
- L = 8 defined lengths
- W = 8 defined widths
- Active edge

ESM-54
Surface with grip pads
- L = Customer-specific
- W = Customer-specific

Mat types ESM-52/54
You will find general technical data on safety mats as well as accessories on the last page.

Types
- Length x width: Customer-specific/Customer-specific
- Thickness
  - Active grip structure: 11.4 mm
  - Without structure: 10 mm
- Weight
  - Active grip structure: 11.5 kg/m²
  - Without structure: 10.5 kg/m²
- Number of cables: 2
- Cable length
  - 300 mm (ESM-52) or
  - Customer-specific (ESM-54), max. 5 m
- Cable position
  - 150 mm from edge (ESM-52)
  - Side as shown in drawing, or
  - Customer-specific (ESM-54)
- No-load resistance: > 10 Mohm
- Active switching: 3 (ESM-52) or
  - Customer-specific (ESM-54)
- Surface
  - Customer-specific (ESM-52)
  - See last page (ESM-54)

Safety mats

Safety mat ESM-57 – special shapes

Tailor-made for your requirements
Do you have a special application with individual dimension and functional requirements? The ESM-57 mat is produced in the size, shape and with the surface that you require. You also have the option to individually determine the position of the cable outlet and to integrate various active switching zones, which are highlighted in different colours.

Mat types ESM-57
You will find general technical data on safety mats as well as accessories on the last page.

Safety mats are specifically adapted and produced according to your requirements. Our specialists will be happy to offer individual advice.
Forklift mats

Sensor mat for presence detection

Developed for use on electrically driven vehicles

The EMP mat is installed on the standing platform of the vehicle and is primarily a surface switch that detects the presence of a person. The vehicle is stopped if the driver leaves the standing platform. This avoids serious accidents, injury to people and damage to property. It is therefore impossible to drive the vehicle from outside the operator’s position in vehicles which are not designed for such a function, thereby guaranteeing safe vehicle operation.

ESM-Presence mat types

You will find general technical data on safety mats as well as accessories on the last page.

EMP

Surface with grip pads (also without structure)

Types

The EMP forklift mats are specifically developed and tailor-made in line with your requirements.

This means that the outline, dimensions, surface structure, mat strength, hardness, size and position of additional switching zones, as well as the number and position of cable outlets are freely configurable in many areas.

The cable connections can be fitted with the plug connectors of your choice. The customer-specific surface offers an optimum and therefore secure grip. The soft mat offers protection against harmful vibrations, safeguarding the driver’s health.

In combination with presence detection, additional zones for foot-switch functions can be integrated into the EMP forklift mats and highlighted in different colours.

Thanks to the tailor-made solution, the mat is adapted perfectly to your industrial truck. Our specialists will be happy to offer individual advice.
ES-Button

ES-Button flat button

**Application**
ES-Button is a flat button used to control different machine functions. Regardless of whether a door is to be opened by an impulse, or an application is to be started, ES-Button is the interface between man and machine.

**Benefit**
Mounted horizontally or vertically, it can be easily actuated by hand, foot or arm. The extremely robust design allows it to be used in a contaminated as well as in a moist environment, where it is subject to heavy mechanical loads.

---

**Dimensions**
in mm

- Active switching zone
- Marking for the mounting hole (max. 6 mm diameter)

**Activation options**

- By hand
- By foot
- By arm

**Technical data**

- **Dimensions**: 150 x 150 x 15 mm
- **Material**: Polyurethane black/yellow
- **Weight**: 0.25 kg
- **Application temperature**: +5°C to +50°C
- **Protection class**: IP 67
- **Loading capacity**: 48 V, 0.1 A
- **Response power**: 35 N (typical)
- **Response travel**: 0.5 mm
- **Switching contact**: Potential-free NO contact
- **Cable type**: DM cable 2 x 0.5 mm²
- **Cable length**: 5 m

Active grip structures

In the ESM-54/57, it is possible to select from the following structures:

- **Structure A**
  - Ø 25 mm, distance 29.5 mm
  - Grip pad height 1 mm

- **Structure D**
  - Ø 23 mm, distance 25 mm
  - Grip pad height 1.4 mm

- **Structure G**
  - Smooth surface

Colours

In the ESM-54/57, it is possible to select from the following colours:

- Yellow
- Orange
- Grey
- Black

Technical data

**Safety mats**

- **Material** Polyurethane (PUR)
- **Material hardness** 55 ±5 Shore A / 80 ±5 Shore A
- **Colours** Black, Grey, Yellow, Orange
- **Dimensions** (length x width)
  - Max. 1600 x 1000 mm
  - Max. 1200 x 1250 mm
  - Min. 200 x 200 mm (smaller on request)
- **Manufacturing tolerances**
  - Length and width: +1/–1.5 mm
  - Thickness: ±1.5 mm
  - All other dimensions acc. to DIN ISO 2768-C
- **Ambient temperature**
  - –25°C to +70°C (operation and storage)
- **Loading capacity/Vehicle capacity**
  - 1 x 2000 N/cm²
  - 6000 x 2000 kg on fork lift truck roll 90 mm wide
  - 1 million x 1000 N with test object 80 mm acc. to standard EN ISO 13856-1
  - 5 million x 750 N with test object 80 mm, mat in combination with ES switching device
- **Voltage** max. 48 V AC/DC
- **Current** max. 0.5 A
- **Response time** < 5 ms, EsMatix 3 switching device
- **Protection class** IP 67 acc. to EN 60529 without cable ends
- **Insulating strength** > 1500 V AC
- **Cable type** 2 x 0.5 mm²
- **Cable length**
  - Standard: 300 mm, with plug connector
  - Customer-specific: max. 5 m, without plug connector
- **Composition** (> 1% by weight)
  - Polyurethane PUR (sealing compound)
  - Fibreglass epoxy resin (contact surface substrate)
  - Copper (contact surfaces, cables)
- **Standards** Bircher safety mats correspond to PL e and cat. 3 acc. to EN ISO 13849-1 and are type-tested acc. to EN 13856-1
- **Chemical resistance of PUR**
  - Weather, ozone, oils, petrol, water 20°C, solvents, acids

**Note**
